BUILD.ONE

Move to the Web and Leverage AI With Build.One

WELCOME

We are pleased to introduce you to Build.One today!

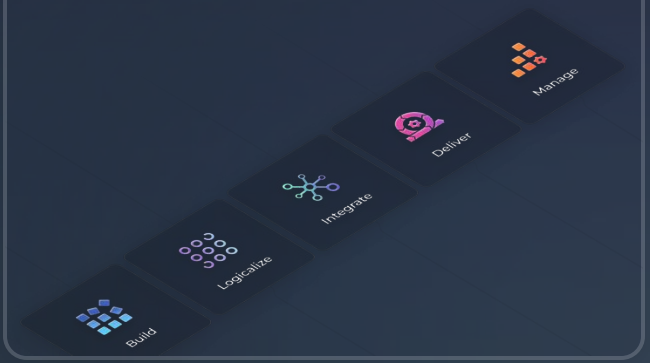
Our Story

Revolutionizing Application Development

Founded in 2013 by Mike Liewehr
to modernize business applications faster
without losing flexibility and UX

Platform

Development Platform for Enterprise Web Applications



Integrated CI/CD
Visual Designers
...
400+ integrations
Pro-Code IDE for web
Automation Workflows

B1's Edge

Re-use tried & tested business logic and backend data while moving to the web module by module.

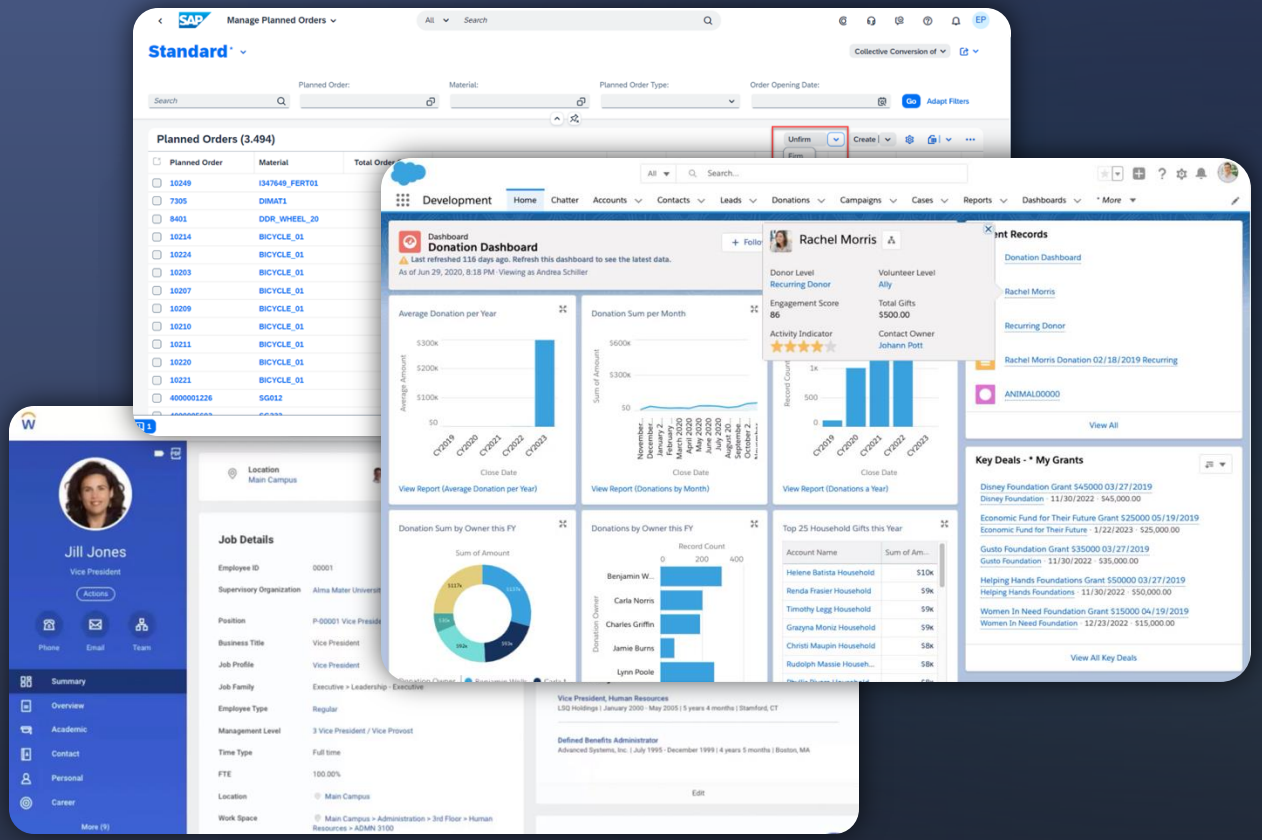
Natively connects to OpenEdge backends
Modern UI & feel out-of-the-box
Stepwise modernization reduces risk & cost

01

Enterprise Applications for the Web

THE CHALLENGE

Modern enterprise applications are built for web



Greater Agility

Simpler Upgrades

Increased Scalability

Integrations

Modern UX

Improved Accessibility

THE CHALLENGE

Unfortunately, they are built using Web Frameworks

- Shallow learning curve
- Not made for business applications
- Many “unknown unknowns”
- Long time-to-market
- Not future proof

CUSTOMER

Swiss Government Health Care System

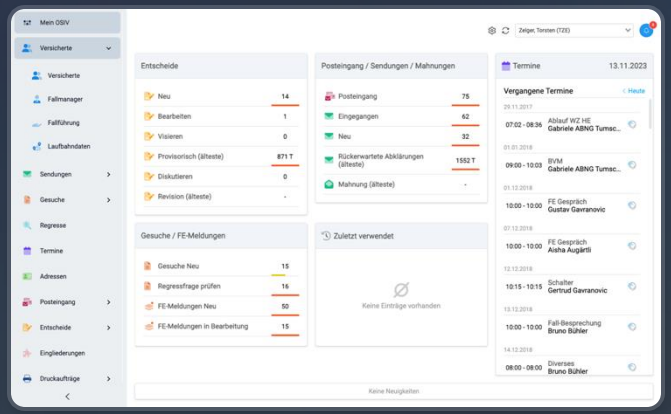
Modernization of large-scale monolith

OSIV open system iv

Disability insurance for the entire process and customer data

- > 1.300 users
- > 1.000 screen masks
- > 25 Mio. documents

Web-based CRM and ERP



Complexity

User Experience

Without Web Know-How

Implemented by Strong Partners

Progress®

Infrastructure & Governance

Consultingwerk

software architecture and development

Develop with B1

BUILD.ONE VALUE PROPOSITION

We Provide Developers the Platform to Build Modern Enterprise Web Applications

Design

- Modern Web Experience
- Visual Designers
- Ready-to-use objects
- Custom Theming

Integrate

Progress OpenEdge

node JS TS

REST API Java

And others...

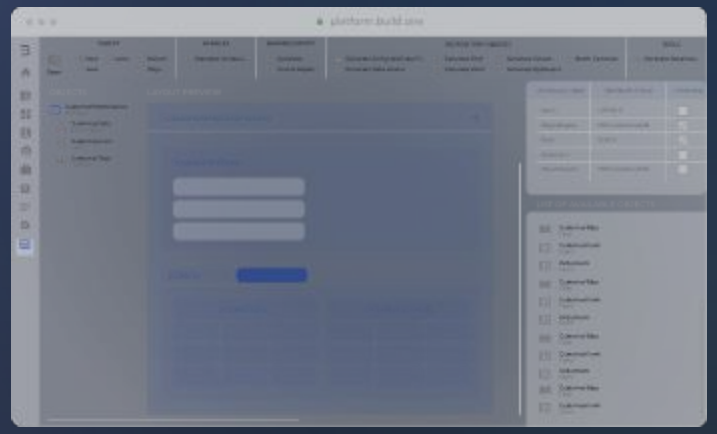
- Web-based IDE
- 400+ connectors

B1 UNIQUE VALUE

Design Sophisticated User Interfaces for the Web independent of skill set

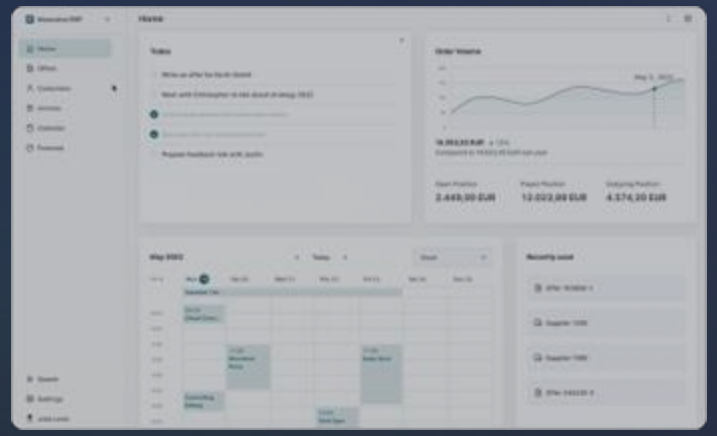
Design Screens with drag & drop

Use of visual designers to build screens and forms



No need to start from scratch

Use our existing library of objects



5-10x faster

Collaborate with Business Owners

Let developers focus on logic

BUILD.ONE VALUE PROPOSITION

We Provide Developers the Platform to Build Modern Enterprise Web Applications

Design

- Modern Web Experience
- Visual Designers
- Ready-to-use objects
- Custom Theming

Integrate

Progress OpenEdge

node JS TS

REST API Java

And others...

- Web-based IDE
- 400+ connectors

Automate

- Automation Hub
- Rules Engine

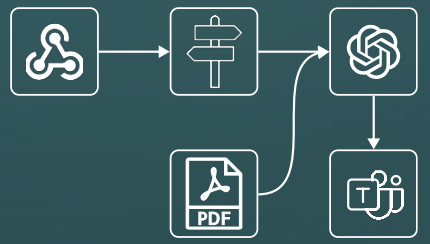
B1 UNIQUE VALUE

Make Use of Low-code where it makes sense!

- Inflexible
- Costly

Rules Engine

Automation Hub



- Speed
- Reduced cost
- Flexibility
- Collaboration

BUILD.ONE VALUE PROPOSITION

We Provide Developers the Platform to Build Modern Enterprise Web Applications

Design

- Modern Web Experience
- Visual Designers
- Ready-to-use objects
- Custom Theming

Integrate

Progress OpenEdge

node JS TS

REST API Java

And others...

- Web-based IDE
- 400+ connectors

Automate

- Automation Hub
- Rules Engine

Deliver

- Environments & Dev Workflows
- CI/CD & Container

Manage

- Security
- User Mgmt.

Innovate with Build.One

WHAT'S NEXT?

Don't stop there – capabilities to stay competitive

The need to integrate...

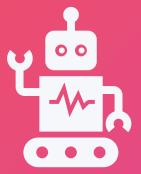
of applications deployed increases by **~15%/p.a.**

Only **1/3** are integrated

The need to iterate...

Trials & A/B Testing

Adaptations to shifting demands



The need to automate...

Workflows & AI
