Disrupting Mobile Development: Cloud Tools

Max Katz
Head of Developer Relations, Appery.io

@maxkatz

max@exadel.com

Exadel

An enterprise mobile software development company that provides services, technology innovations, and solutions to businesses worldwide

Most* development in the (near) future will be done in the cloud.

Dev. tools

Nothing to download
Nothing to install
No maintenance
Nothing to update

Software, frameworks

Nothing to download
Nothing to install
No maintenance
Nothing to update

Development

Connect to any API
Sharing
Collaboration
Testing
Super fast
Easy (finally, concentrate on the app)
Source control integration
Develop anywhere

Some examples of cloud tools:

Progress MobileEdge (powered by Appery.io)
ApplicationCraft
Icenium
Eclipse Orion project
Cloud9 IDE
Codenvy
Brackets

Let's build an app!

Progress MobileEdge Platform
Connect to 3rd party cloud API
Native API (via Apache Cordova)
Cloud Build
Plug-ins
Connect to mobile API backend
Sharing

Ultimate Platform

Dev. tools
Cloud APIs
Enterprise (organization) APIs
App storage
Push Notifications
Server code

Thank You.
